## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 5 each recite, among other features, that the hydrogen occlusion tank is heated by using mixed air which is supplied through a duct. Applicant's arguments of July 19, 2004 are persuasive in that Kuranaka et al., the closest prior art, does not teach or fairly suggest supplying previously mixed air through a duct to the hydrogen storage vessel. As such, the claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
